

GOURAV GUPTA

QA Automation Engineer

Kolkata, India • +91-6296933734 • guptago8000@gmail.com • LinkedIn: [in/gouravgupta99](https://www.linkedin.com/in/gouravgupta99) • GitHub: github.com/guptago800-maker

PROFESSIONAL SUMMARY

QA Automation Engineer with 3.8+ years at Cognizant, specialising in Playwright (TypeScript) automation across Retail and Airline domains. Reduced manual testing effort by 35%, automated 300+ test cases, cut regression cycle time by 40%, and achieved 95%+ test coverage on critical user journeys — delivering zero-defect releases across UI, API, and mobile platforms. Experienced in building frameworks from scratch, shift-left testing, CI/CD integration, and cross-functional Agile delivery.

TECHNICAL SKILLS

Test Automation: Playwright (TypeScript), Appium (Java), Selenium (familiar)

API Testing: Playwright APIRequestContext, Postman (request validation, collection runner, environments)

Languages: TypeScript, JavaScript, Java

Testing Types: UI, API, Functional, Regression, Smoke, End-to-End, Cross-Browser, Mobile (Android & iOS), Shift-Left Testing

Frameworks & Practices: Page Object Model (POM), BDD, TDD, Agile/Scrum

Test Practices: Test Strategy, Test Plan, Test Design, Test Execution, Defect Lifecycle, QA, STLC, SDLC

CI/CD & DevOps: Jenkins, GitHub Actions, Git

Reporting & Defects: Allure Reports, HTML Reports, Playwright Test Reports, Jira, Azure DevOps (ADO)

AI Tools: Claude AI, GitHub Copilot, Cursor

Database: SQL

Domains: Retail, E-commerce, Warehouse Management System (WMS), Airline

WORK EXPERIENCE

QA Automation Engineer | Cognizant Technology Solutions, Kolkata Oct 2022 – Present

Associate (Oct 2025–Present) | Programming Analyst (Oct 2023–Sep 2025) | Programming Analyst Trainee (Oct 2022–Sep 2023)

Retail — WMS | QA Automation Engineer (Associate)

Jan 2026 – Present

- Designed and built a scalable Playwright (TypeScript) automation framework from scratch for UI and API testing.
- Automated 20+ critical workflows including PO validation, ASN creation, inbound delivery and putaway operations.
- Developed hybrid API + UI framework with JSON-based shared data store for cross-layer data handling.
- Reduced manual testing effort by ~30% through regression and smoke suite automation.
- Integrated test execution with Jenkins CI/CD pipelines for continuous feedback across SDLC.
- Used Claude AI for debugging, framework design and test architecture decisions.
- Tracked and managed defects in Jira; collaborated cross-functionally using Agile methodology.

Retail — E-commerce | QA Automation Engineer (Programming Analyst)

Feb 2024 – Dec 2025

- Enhanced and maintained Playwright (TypeScript) automation framework using Page Object Model (POM), reducing manual testing effort by 35%.
- Implemented mobile automation using Appium (Java) for Android and iOS platforms.
- Performed cross-browser and cross-device testing using BrowserStack across Chrome, Firefox, Safari and mobile devices.
- Integrated CI/CD pipelines with Jenkins for nightly regression runs following Agile methodology.
- Used Cursor AI for intelligent code completion, refactoring and test script generation.
- Managed version control using GitHub; tracked defects in Jira across SDLC and STLC cycles.

Airline Domain | QA Automation Engineer (Programming Analyst Trainee)

Oct 2022 – Jan 2024

- Created and maintained test cases from user stories in Azure DevOps following STLC and SDLC processes.

- Achieved 95%+ test coverage across booking and check-in workflows.
- Automated critical UI scenarios using Playwright (TypeScript), reducing regression cycle time by 40%.
- Used GitHub Copilot for AI-assisted test script generation, reducing manual coding effort.
- Tracked and managed 60+ defects in Azure DevOps, ensuring zero critical defects at release.
- Contributed to test planning and strategy within Agile methodology and QA lifecycle.
- Collaborated cross-functionally with developers and business stakeholders across SDLC.

PROJECTS

Playwright Automation Framework | Personal Project | github.com/guptago800-maker 2024

- Built end-to-end automation framework using Playwright and TypeScript covering UI, API and E2E scenarios across Chrome, Firefox and Safari.
- Implemented Page Object Model (POM) with base page class for maintainability across 21+ automated test cases.
- Designed reusable auth fixture for token management — eliminating duplicate login logic across all test suites.
- Configured GitHub Actions CI/CD pipeline for automated test execution on every pull request.
- Integrated Allure Reports for detailed test insights, step-level details and historical trend analysis.
- Added API validation layer using Playwright APIRequestContext to validate backend services alongside UI flows.
